TRANSCRIPT

Data Types, Structures, and Collection
Basic Statistics and Distributions
Storytelling with Data Visualizations
The Evolution of Data Architectures and the Lakehouse
Cloud Datawarehouse: Snowflake ve Databricks
How to use GPUs effectively?
From Data to Machine Learning
Data Preparation for Machine Learning
Core ML Models & Why They Work
Introduction to Data Management
The Data & AI Connection

Building the Intelligent Data Foundation
Case Study: ML in Action
Introduction to Neural Networks
From Neural Networks to Modern AI
Intro to Generative AI
LLM Deep Dive
AI Tooling Best Practices
Introduction to Agentic AI
AI Ethics
AI Agent Development Case Study
Project: Responsible and Explainable AI System Design
