Arda Kabal

has successfully completed the online Professional Certificate

Unilever Supply Chain Data Analyst

With an expected growth rate of 18%, there hasn't been a better time to enter the field of supply chain analytics. In this program, you'll learn in-demand skills like data analysis, demand forecasting, and cost analysis to get job-ready in less than 4 months, with no prior experience needed to get started. This program is designed for entry-level professionals, business administrations graduates and those with strong problem solving, time management, and organizational skills. You will learn the foundational skills employers seek for entry level supply chain analysts roles and get hands-on experience cleaning, filtering, sorting, and presenting data.

Unilever

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
